JOSEPH BAKER NAMED CEO OF ACCIONA WINDPOWER NORTH AMERICA

Baker to Lead Aggressive Roadmap for 2010 and Beyond

West Branch, IA – May 24, 2010 – ACCIONA Windpower, a proven and trusted manufacturer of performance-focused wind turbine generators, announced today the appointment of Joseph (Joe) Baker to the position of CEO of ACCIONA Windpower North America. Baker will apply 30 years of experience in management within power technologies and sustainability-focused businesses and lead ACCIONA Windpower to meet aggressive goals for 2010 in turbine sales, production and domestic supply chain goals.

Baker comes to ACCIONA from ABB, Inc., a global leader in power and automation technologies that enable utility and industry customers to improve their performance while lowering environmental impact. During his 15 year tenure at ABB, Baker has helped the organization achieve its overall strategy of improving energy efficiency, grid reliability and industrial productivity for North American customers. He led ABB's Power Products and Power Systems Divisions Strategic Marketing initiative in North America, developing new and maximizing existing growth strategies throughout the region. Previous to ABB, Inc. Baker held senior and general management roles at Sumitomo Corporation of America, B/E Aerospace, Inc. and Westinghouse Electric Corporation.

Baker will help ACCIONA Windpower expand the North American pipeline for its AW-1500, 1.5 MW turbine and prepare the company to begin producing the AW-3000, ACCIONA's 3 MW wind turbine currently being prototyped. Baker will also oversee the company's aggressive transition to a domestic supply chain which began with the ACCIONA Windpower's establishment of U.S. turbine assembly two years ago in West Branch, Iowa. The company has gone from 0 to 63 percent of its wind turbine components being sourced from North American suppliers in the last two years, and under Baker's direction, the company aims to source 90 percent of their bill of material domestically by the end of 2010.

"ACCIONA is a pioneer in development and sustainability with an ultimate goal of creating shareholder value through socially responsibility – Joe Baker shares this vision and these values. I am pleased to announce that after many months of searching nationwide for an executive with the background and skills necessary to aggressively drive the ACCIONA Windpower business forward in the North American market, we have found the right person," said Peter Duprey, CEO of ACCIONA Energy North America. "Joe brings the perfect blend of technology, manufacturing and sales know-how to our turbine manufacturing business."

"I am honored to join a business that not only has a high-performing, safe and reliable product but also has sustainability at the core of everything they do. Our work, and the cumulative work of our industry, will be part of the larger solution to meet some of our nation's most crucial needs

to create new jobs for skilled workers, combat climate change and create a new and more independent energy economy.” said Joe Baker.

About ACCIONA Windpower

ACCIONA Windpower is an independent business unit under the umbrella of ACCIONA Energy that designs and assembles 1.5 and 3.0 MW wind turbine generators. ACCIONA Windpower provides wind project managers, long-term owners and lenders confidence in the assets that matter most. ACCIONA Windpower turbines apply proven technology that is performance-focused, safe and ready to finance. An ACCIONA Windpower turbine is the result of nearly 20 years of accumulated knowledge from developing, owning and operating thousands of machines across the globe. ACCIONA Windpower North American headquarters are in West Branch, Iowa.

About ACCIONA Energy

ACCIONA Energy is a global clean-tech operator backed by more than 20 years of experience and a leading presence in seven renewables technologies. It has installed more than 9,000 MW of electricity generation in 14 countries: 7,337 MW are proprietary. The Company has 213 wind farms (6,230 MW); 80 hydroelectric power stations (911 MW); a number of solar thermal (CSP) and PV plants that rank among the biggest in the world, and biomass-fired power plants. ACCIONA Energy manufactures wind turbine generators and has biodiesel and bioethanol production units. The Company, which develops proprietary projects as well as projects for clients, is to be found across the entire value chain, produces and markets renewables-based energy and delivers a broad range of services for clients within this sector, as part of a staunch commitment to innovation.

*ACCIONA Energy is part of the **ACCIONA Group**, one of Spain's leading business corporations. ACCIONA operates in infrastructure, energy, water treatment and services in more than thirty countries on the five continents. Its corporate motto, “Pioneers in Sustainable Development”, reflects the Company's commitment to contributing to economic growth, social progress and environmental balance. ACCIONA is sector leader in the Dow Jones Sustainability Index, and posted revenues of more than €6.5 billion in 2009. The Company has a workforce of around 35,000 and is quoted on the IBEX 35 blue chip index (ANA.MC). For more information: www.acciona.es*
